Civil Service Injury/Illness Fiscal Year 2001 – 1st Quarter

We have completed the end of the Fiscal Year 2000, and would like to commend all civil servants and contractors on our safety performance during the most recent Fiscal Year. Lost time incident rates rose slightly in FY00 for the civil servants. Civil servant employees ended FY00 slightly over their goal of .20, and these results reflect a total of 7 civil servant lost time accidents. Even with this slight increase, the lost time rate has shown a steady decline from the experience of the early and mid-1990's. This has been achieved through the continued diligence of all Glenn employees (civil servants and contractors).

A true goal of "0" fatalities, injuries, and equipment/facility damage, although rare, is achievable in a true TQ environment. Each one of us has a responsibility to conduct ourselves in as safe a manner as possible, whether it is on- or off-the-job. We will only continue our fine record through our own individual proactive efforts, coupled with continuing teamwork and cooperation by our civil service managers and supervisors; all contract project managers and their supervisors; all employee unions; the "safety and technical professionals" that serve as part of the Glenn Safety Organization; and our most important resource, the employees of Glenn Research Center.

GRC SAFETY HIGHLIGHTS Fiscal Year 2000

0 FATALITIES

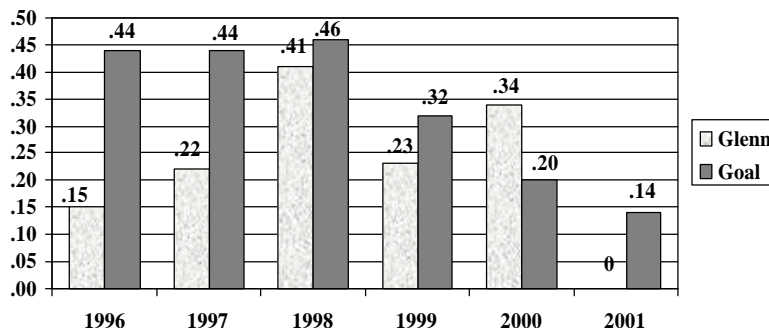

2 EQUIPMENT/FACILITY DAMAGES

7 LOST TIME CASES

15 INCIDENTS W/INJURY

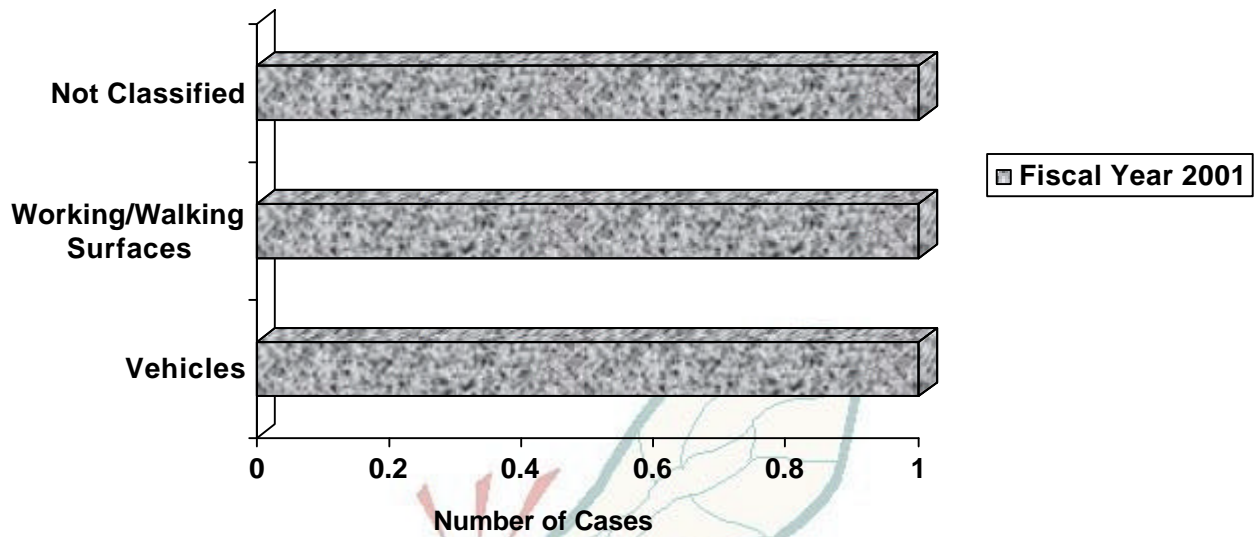

77 FIRST AID CASES

Civil Service Lost Time Rate Fiscal Year 2001/ First Quarter

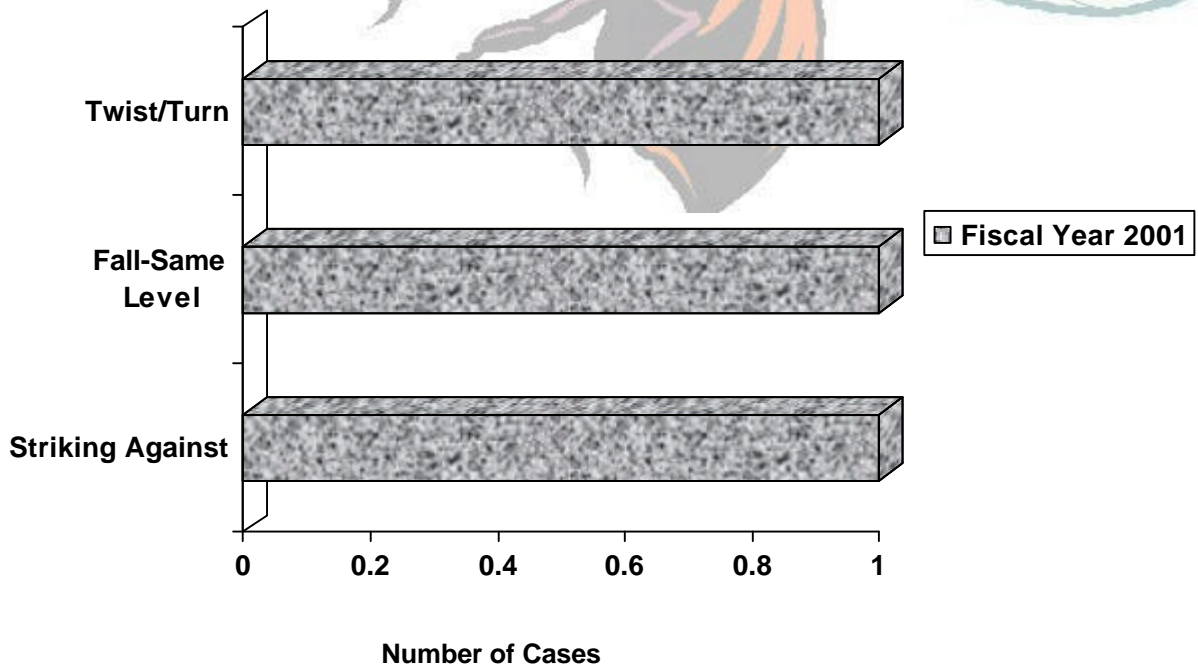

LTR = # of Lost Time Incidents x 200,000 / # of Hours Worked

PERSONNEL ENVIRONMENT SUMMARY: ACTIVITY

Note: First Aid cases are NOT included

CIVIL SERVICE PERSONNEL ENVIRONMENT SUMMARY: AGENCY
